CHAPTER 1. Introduction to V-ATPases

HARVEY, W. R. Physiology of V-ATPases 1

NELSON, N. The vacuolar H^+-ATPase – one of the most fundamental ion pumps in nature 19

GLUCK, S. V-ATPases of the plasma membrane 29

MELLMAN, I. The importance of being acid: the role of acidification in intracellular membrane traffic 39

CHAPTER 2. Biochemistry and molecular genetics of fungal vacuoles

STEVENS, T. H. The structure and function of the fungal V-ATPase 47

BOWMAN, B. J., DSCHIDA, W. J. AND BOWMAN, E. J. Vacuolar ATPase of *Neurospora crassa*: electron microscopy, gene characterization and gene inactivation/mutation .. 57

ANRAKU, Y., HIRATA, R., WADA, Y. AND OHYA, Y. Molecular genetics of the yeast vacuolar H^+-ATPase 67

KLIONSKY, D. J., NELSON, H., NELSON, N. AND YAVER, D. S. Mutations in the yeast vacuolar ATPase result in the mislocalization of vacuolar proteins 83

KANE, P. M. Biogenesis of the yeast vacuolar H^+-ATPase 93

MANOLSON, M. F., PROTEAU, D. AND JONES, E. W. Evidence for a conserved 95–120 kDa subunit associated with, and essential for, activity of ATPases 105

CHAPTER 3. Biochemistry of plant tonoplasts

TAIZ, L. The plant vacuole 113

SZE, H., WARD, J. M., LAI, S. AND PERERA, I. Vacuolar-type H^+-translocating ATPases in plant endomembranes: subunit organization and multigene families 123

GOGARTEN, J. P., STARKE, T., KIBAK, H., FISHMANN, J. AND TAIZ, L. Evolution and isoforms of V-ATPase subunits 137

CHAPTER 4. Biochemistry of mammalian endomembranes

NELSON, N. Structure and function of V-ATPases in endocytic and secretory organelles ... 149

FORGAC, M. Structure, function and regulation of the coated vesicle V-ATPase 155

MORIYAMA, Y., MAEDA, M. AND FUTAI, M. The role of V-ATPase in neuronal and endocrine systems 171

CHAPTER 5. Physiology of phagocytes and bone epithelia

GRINSTEIN, S., NANDA, A., LUKACS, G. AND ROTSTEIN, O. V-ATPases in phagocytic cells . 179

CHATTERJEE, D., CHAKRABORTY, M., LEIT, M., NEFF, L., JAMSA-KELLOKUMPU, S., FUCHS, R., BARTKIEWICZ, M., HERNANDO, N. AND BARON, R. The osteoclast proton pump differs in its pharmacology and catalytic subunits from other vacuolar H^+-ATPases .. 193

CHAPTER 6. V-ATPases and ion channels of kidney vacuoles and plasma membranes

GLUCK, S. AND NELSON, R. The role of the V-ATPase in renal epithelial H^+ transport 205

GLUCK, S. L., NELSON, R. D., LEE, B. S., WANG, Z.-Q., GUO, X.-L., FU, J.-Y. AND ZHANG, K. Biochemistry of the renal V-ATPase 219

BROWN, D., SABOLIC, I. AND GLUCK, S. Polarized targeting of H^+ V-ATPase in kidney epithelial cells 231

Contents

PAGE

AL-AWQATI, Q., BARASCH, J. AND LANDRY, D. Chloride channels of intracellular organelles and their potential role in cystic fibrosis 245

CHAPTER 7. Physiology of eukaryote plasma membranes

SLAYMAN, C. L. Some remarks on the integrated actions of pumps, cotransporters and channels 267

BERTL, A. AND SLAYMAN, C. L. Complex modulation of cation channels in the tonoplast and plasma membrane of *Saccharomyces cerevisiae*: single-channel studies 271

HARVEY, B. J. Energization of sodium absorption by the H^+-ATPase pump in mitochondria-rich cells of frog skin 289

BAKKER-GRUNWALD, T. Ion transport in parasitic protozoa 311

CHAPTER 8. Insect plasma membranes

ZEISKE, W. Insect ion homeostasis 323

WIECZOREK, H. The insect V-ATPase, a plasma membrane proton pump energizing secondary active transport: molecular analysis of electrogenic potassium transport in the tobacco hornworm midgut 335

KLEIN, U. The insect V-ATPase, a plasma membrane proton pump energizing secondary active transport: immunological evidence for the occurrence of a V-ATPase in insect ion-transporting epithelia 345

DOW, J. A. T. pH gradients in lepidopteran midgut 355

WOLFERSBERGER, M. G. V-ATPase-energized epithelia and biological insect control 377

MARTIN, F. G. Circuit analysis of transmembrane voltage relationships in V-ATPase-coupled ion movements 387

MOFFETT, D. F. AND KOCH, A. Driving forces and pathways of H^+ and K^+ transport in insect midgut goblet cells 403

MADDRELL, S. H. P. AND O'DONNELL, M. J. Insect Malpighian tubules: V-ATPase action in ion and fluid transport 417

CHAPTER 9. F-ATPases and genetically related pumps

MCCARTY, R. E. A plant biochemist's view of H^+-ATPases and ATP synthases 431

FUTAI, M., IWAMOTO, A., OMOTE, H., ORITA, Y., SHIN, K., NAKAMOTO, R. K. AND MAEDA, M. *Escherichia coli* ATP synthase (F-ATPase): catalytic site and regulation of H^+ translocation 443

DECKERS-HEBESTREIT, G. AND ALTENDORF, K. The F_o complex of the proton-translocating F-type ATPase of *Escherichia coli* 451

JUNGE, W., ENGELBRECHT, S., GRIWATZ, C. AND GROTH, G. The chloroplast H^+-ATPase: partial reactions of the proton 461

IHARA, K., ABE, T., SUGIMURA, K.-I. AND MUKOHATA, Y. Halobacterial A-ATP synthase in relation to V-ATPase 475
